

BILL'S STORY

We can see how we relate to Bill. Not in his circumstances, but in how he THINKS, DRINKS and FEELS. I need to see that my circumstances are not what qualify me to call myself the 'real alcoholic'. Our circumstances from drinking may be different, although many of us share the similar problems as a result of our drinking, not all of us do. What about the housewife who drinks at home and never gets a DUI or arrested as a result of drinking, but still have the physical allergy? I have to see that when I drink I have a physical allergy and when I put alcohol in my body I have no control over the amount that I drink. Despite the 'ominous warnings' I continue to drink.
